基于案例的 WEB 攻击与防御研究 Case based WEB attack and defense research

摘要

为深入学习网络安全,本文将使用一些常见的 WEB 攻击方式来进行渗透测试,为了模拟现实案例,测试环境将是一个易受攻击的 WEB 应用程序(DVWA)。在文中总结了部分常见的 WEB 攻击方式,当然还有这些常见攻击方式的一些防御方法。本文希望对安全人员具有一部分安全参考价值,这对于降低 WEB 安全威胁将具有重要意义。

关键字: 网络安全, WEB 安全, 案例, WEB 攻击, WEB 攻击防御

Abstract

In order to further study network security, this article will use some common WEB attack methods to conduct penetration test. In order to simulate real cases, the test environment will be a vulnerable WEB application (DVWA). This article summarizes some common WEB attack methods, and of course, some defense methods for these common attacks. This article hopes to have a part of the security reference value for security personnel, which will be of great significance to reduce the threat of WEB security.

Key words: Network security, WEB security, Case, WEB attack, WEB attack defense
