

01:00:00		GRAPHICS ON SCREEN: PREVIOUSLY ON
01:00:01	Narrator	Previously on Ice Cold Gold.
01:00:04	Josh Feldman (Archive)	There's about 6-7 locations we can get to, if we split our team.
01:00:10	Eric Drummond (Archive)	We changed plans, and now we're paying for it.
01:00:13	Josh Feldman (Archive)	You know what? Your attitude <BLEEP>!
01:00:15	Josh Feldman (Archive)	I just can't work with Eric any longer.
01:00:17	Eric Drummond (Archive)	Go.
01:00:17	Josh Feldman (Archive)	Had enough.
01:00:18	Unknown Miner (Archive)	So you're quitting.
01:00:19	Jesse Feldman (Archive)	<BLEEP> done!
01:00:20	Eric Drummond (Archive)	See yer.
01:00:21	Eric Drummond (Archive)	We're gonna succeed, they won't. That's the bottom line.
01:00:25	Josh Feldman (Archive)	This is my moment, this is my one chance and, if I fail, I'm never gonna get that chance again.
01:00:37		TITLE SEQUENCE
01:01:17		GRAPHICS ON SCREEN: ICE COLD GOLD
01:01:26	Narrator	Greenland, a land of endless beauty, and impossible scale. Its landscape is littered with glaciers so enormous that they leave mountains in their wake.
01:01:37	Narrator	But, just as Greenland has the power to create, equally as strong is its power to destroy.
01:01:44	Josh Feldman (Archive)	That's the way it is, I'm not...

01:01:45	Eric Drummond (Archive)	Go for it.
01:01:45	Josh Feldman (Archive)	... putting up with your attitude anymore; I've had enough.
01:01:48	Narrator	After nearly three years of prospecting in the remote arctic, the members of Sixty Degree Resources have separated.
01:01:54	Eric Drummond (Archive)	You guys are clearly amateurs.
01:01:56	Eric Drummond	Feldmans do things without any apparent reason; that's chaos.
01:02:01	Josh Feldman (Archive)	You know what? Your attitude <BLEEP>!
01:02:03	Josh Feldman	Eric acts almost as if like he's our father; he doesn't make all the damn decisions.
01:02:09	Narrator	And, now, like a glacier slicing through rock to form a canyon, the company's fractured into two opposing sides.
01:02:14	Eric Drummond (Archive)	Go!
01:02:15	Josh Feldman (Archive)	We're done!
01:02:16	Eric Drummond (Archive)	Go.
01:02:16	Jesse Feldman (Archive)	I've had enough. Done!
01:02:24	Narrator	One of those sides is comprised of Americo, Gator and the company's only geologist, Eric.
01:02:31	Gator Schoose	It's hard for me because the Feldman's and I are friends, I mean, we've known each other since we were little, so. It's a little frustrating that they decided they just weren't into it anymore, and they wanted to run off and look at some different locations, and we have twice as much work to do now that there's only three of us, so. It could be considered a little selfish.
01:02:37		GRAPHICS ON SCREEN: GATOR SCHOOSE EXCAVATION EXPERT

01:02:50	Eric Drummond	This is where it starts, the same plan that we had six people doing, now we're doing it with three people.
01:02:56	Narrator	Not only will the team now have more work to do, but they'll have less money to do it. When the Feldmans and John left, they took half the company's resources with them.
01:03:04	Eric Drummond	Having the Feldmans go out on their own and splitting our resources, that puts more pressure on us, so I don't feel very good. And, yet, at the same time, this is it, this is our last big push in Greenland; we're following through with the plan, and we've gotta make it work.
01:03:07		GRAPHICS ON SCREEN: ERIC DRUMMOND GEOLOGIST
01:03:21	Narrator	But making it work will mean moving quickly. They have just seven days left in the mining season, before the harsh conditions of Greenland's winter push them out.
01:03:30	Narrator	Eric's original plan was to visit just one more target.
01:03:34	Eric Drummond	I wanna show them that we can do this by ourselves.
01:03:36	Gator Schoose	Yeah.
01:03:37	Narrator	But all season long, he's had two additional wildcat prospects up his sleeve, and one of those targets isn't gold.
01:03:44	Eric Drummond	I spent all winter researching, finding out where the gold's gonna be, but I happen to know that Greenland is not just known for its gold, there has been indications of oil, so we're gonna be looking at oil deposit, and we hope that has real good potential.
01:03:57	Eric Drummond	It's a bit of a wildcat but I'd love to find some oil.
01:04:01	Gator Schoose	We're all over the board now.

01:04:02	Eric Drummond	It's risk reward, but I think it's worth it, and I highly doubt that the Feldmans are doing anything like this.
01:04:08	Gator Schoose	I know that Eric is real diligent in his research, and, yeah, it's turned into a competition between us and the Feldmans so. If we can add an oil claim that would be great, but following him to these locations is a risk; it's kind of a long shot.
01:04:21	Narrator	These locations will take them further north than any of them have ever been, and their first stop is Eric's primary gold target in the island of Uummanaq.
01:04:26		GRAPHICS ON SCREEN: Map of Greenland showing location of Arctic Circle and Uummanaq.
01:04:32	Gator Schoose	Uummanaq?
01:04:33	Boat Captain	Yeah.
01:04:34	Gator Schoose	Wow!
01:04:34	Eric Drummond	Look at that.
01:04:36	Narrator	500 miles above the Arctic Circle, it's an imposing sight.
01:04:39	Americo Disantis III	You gotta be <BLEEP> me man.
01:04:41	Eric Drummond	Look at the size of that peak.
01:04:44	Narrator	A 4,000 foot tower of rock juts up from the freezing ocean, and looms over the surrounding island.
01:04:50	Narrator	The massive peak gives way to sheer cliff faces and deep gorges at the island's center.
01:04:57	Narrator	Resting in the mountain's ominous shadow is a small fishing village, with just over 1,000 people. Despite the nearby population, Eric believes the island's promising geology is yet to be investigated for gold.

01:05:10	Eric Drummond	Uummanaq, I believe, has the potential to be far better than Eqi and Saqqaq combined. The geology looks very, very similar to some of the best gold deposits in the world; we're looking at potentially hundreds of millions of dollars.
01:05:24	Gator Schoose	We never seen anything like this.
01:05:26	Americo Disantis III	Uummanaq is just massive, and it hopefully has something big, and that's what we're hoping for, a big finish at the end. We're locked and loaded and we're ready to attack this with everything we have.
01:05:31		GRAPHICS ON SCREEN: AMERICO DIS ANTIS III DRILLER
01:05:34	Gator Schoose	Here we are.
01:05:35	Eric Drummond	Let's make the best of it.
01:05:37	Eric Drummond	The Feldmans question what I'm doing, they think that I'm doing it wrong, so. I need to show that my methods are working, my reputation's at stake here.
01:05:48		GRAPHICS ON SCREEN: ILULISSAT
01:05:56	Josh Feldman	There's just the three of us now, and there's gonna be a different dynamic.
01:06:00	Narrator	100 miles away, John and the Feldman brothers have rented a garage to act as their headquarters for the few remaining days before winter.
01:06:07	Josh Feldman	I didn't wanna leave the company, those guys are my friends, but Eric pushed me into a corner and, if I can't work with you, I can't work with yer and I gotta go. And, at this point, I feel like it's time for me to lead and that's just exactly what I'm gonna do.
01:06:10		GRAPHICS ON SCREEN: JOSH FELDMAN HARD ROCK MINER

01:06:20	Josh Feldman	We are an exploration company, from now on, and we're looking for the richest of the rich.
01:06:25	Jesse Feldman	Working with Eric, he wanted it his way, every time, or else he was pissed off, and I had enough of that. Now, we can think for ourselves; it's freedom, it's complete freedom.
01:06:27		GRAPHICS ON SCREEN: JESSE FELDMAN HARD ROCK MINER
01:06:35	Josh Feldman	And, John? You're just as much a part of this team as we are, so, you have an opinion, you have something to say, say something.
01:06:41	John Self	Okay.
01:06:42	Josh Feldman	We're all brothers here in this company.
01:06:43	John Self	Yeah.
01:06:44	Josh Feldman	Okay?
01:06:45	John Self	Definitely I feel a little bit more empowered and a little bit more free with this team; I'm gonna be involved in the decision-making process and that's really made me happy and, so, right now is my time to shine.
01:06:46		GRAPHICS ON SCREEN: JOHN SELF PLACER MINER
01:06:57	Josh Feldman	I created this map; this has all of our locations on it.
01:07:01	John Self	Alright.
01:07:01	Josh Feldman	Okay? And we'll hit each target one-by-one each day.
01:07:04	John Self	Okay.
01:07:04	Josh Feldman	One day, one target.

01:07:06	Narrator	Josh's method for finding gold is about being fast. Instead of setting up base camps, and spending days at a location, as Eric has had them do all season.
01:07:13		GRAPHICS ON SCREEN: Map showing location of Ilulissat and target locations
01:07:15	Narrator	Their team will visit five different targets within 50 miles of Ilulissat, by hitting a new target each day, searching for gold, and quickly moving on.
01:07:24	Josh Feldman	Being small, we can turn that into an advantage, 'cause we can go places fast, quick, light.
01:07:29	Narrator	Some of the targets were chosen based on geological maps, but some were spotted with their own eyes, on previous boat trips.
01:07:36	Josh Feldman	It's just like in the South-West man, back in the United States, the mine that we have today, that mine was found by a prospector out there, and there was a ledge of gold just sitting right out of the rock.
01:07:45	Josh Feldman	This is the way people have been finding gold deposits for hundreds if not thousands of years; it's the same method the '49ers used, in the United States. It's just get out there in the field, and open your eyes; it's the only way we're gonna be successful here in Greenland, and I want to prove that to everybody in this company. This is my moment, everything is riding on me.
01:08:06	Jesse Feldman	We have our plan, so let's get everything together, and let's get outta here.
01:08:09	John Self	Yeah.
01:08:10	Narrator	Hiring boats to take them to their targets will be expensive, but they only have enough for five trips. For their first target, transportation will be free.

01:08:21	Narrator	While John gathers supplies for the team's first prospecting trip, Josh and Jesse will hike an hour outside of Ilulissat, to their first target.
01:08:28	Josh Feldman	Let's head up over on this ridge and see what we got over here.
01:08:30	Jesse Feldman	Yeah.
01:08:32	Narrator	They got a local tip about a gold deposit.
01:08:34	Josh Feldman	Jesse and I got some information in town from a local guy. The locals here, they know Greenland like the back of their hands. He pointed up in the mountains just out of town and said there's gold up there. Now, it's time to finally instate the Feldman plan, we don't have to spend any money, a little bit of time, we're gonna find out if it's there, or not. Eric, he'd be putting into base camp for the next three weeks and spending thousands of dollars, not us.
01:08:59	Jesse Feldman	Oh <BLEEP>. Josh?
01:09:01	Josh Feldman	Yeah.
01:09:02	Jesse Feldman	Look at this. It's a human skull.
01:09:09	Josh Feldman	Oh <BLEEP>.
01:09:12	Josh Feldman	It's just sitting down in the rocks.
01:09:15	Josh Feldman	What the heck!
01:09:20	Jesse Feldman	I've never seen anything like this before in my life, it's just freaky, it's just weird. Why did we find this today?
01:09:28	Josh Feldman	There's another one. There's skulls all over underneath these rocks.
01:09:33	Jesse Feldman	This is freaky. We're smack dab in the middle of an ancient burial ground.
01:09:40	Josh Feldman	These guys could be a few thousand years old. I know that's the Saqqaq people.

01:09:45	Jesse Feldman	Yeah.
01:09:45	Josh Feldman	And they were in Greenland like a few thousand years ago.
01:09:47	Narrator	The Feldmans believe this find may be connected to an ancient Inuit burial ground nearby.
01:09:51	Josh Feldman	I've never come across an ancient burial site like this. There's just probably hundreds of skulls just laying in the rocks, just shallow; all you do is look underneath the rocks and there they are; they're all staring right back at us.
01:10:04	Josh Feldman	Whoa, man, that's <BLEEP> spooky.
01:10:07	Josh Feldman	This is ridiculous. I don't wanna mess with this, I don't wanna touch anything.
01:10:11	Jesse Feldman	I don't think we should be here. Let's, let's get a move on.
01:10:14	Josh Feldman	Okay.
01:10:16	Josh Feldman	Good or bad, this ancient burial ground, it's an omen for sure. This is sacred ground, it needs to be honored and respected, and under no circumstances would I ever disturb anything. It was an unsuccessful target, but we spent no time, no money, and we're onto the next target, as far as I'm concerned, that's the Feldman plan working; sometimes it's not about what you're actually chasing, it's where it takes you to.
01:10:39	Jesse Feldman	Greenland is full of secrets.
01:10:40	Josh Feldman	Yeah, you got that right.
01:10:54	Eric Drummond	This is a, a drill rod that was used to blast out some of this rock, and I'm figuring we could use this for a, like a flag pole somehow. Let's put the flag on, I'm sure we can find a crevice here for it to go in.
01:11:05	Gator Schoose	Oh got it.

01:11:06	Gator Schoose	Can't win without our flag up; we fought for it, we have it, we're still SDR, so it's gonna get raised.
01:11:12	Gator Schoose	We almost had to fight for this.
01:11:13	Eric Drummond	Yeah. It's not much, but it's ours.
01:11:18	Eric Drummond	That looks great.
01:11:19	Eric Drummond	We've had a split in the team, they split from us, we didn't split from them, so we're Sixty Degree Resources, and our flag is hanging high and we put it up on a drill rod. We're resourceful, we make the best of what we have in front of us and this is what we do.
01:11:37	Americo Disantis III	Alright. Looks good.
01:11:40	Americo Disantis III	Now we feel complete.
01:11:45		Break 1
01:11:55		GRAPHICS ON SCREEN: UUMMANNAQ
01:11:56	Eric Drummond	Let's go get some samples.
01:11:57	Gator Schoose	Alright.
01:11:58	Narrator	After splitting off from the rest of the team, Eric, Americo and Gator have set up a new base camp on the northern edge of a remote island called Uummannaq. They believe this mysterious mountain could be an untapped treasure trove of mineral wealth.
01:12:12	Eric Drummond	I'd like to sample either one of those dark inclusions right there; if we can get to that lower left one and, and get a couple of samples I'd be happy.
01:12:20	Narrator	First target is two miles up the coast. There, a 1,000 foot granite cliff, with visible iron and quartz veins embedded in it, awaits them. They hope that translates to a big chunk of gold being there as well.
01:12:33	Americo Disantis III	Wow!

01:12:34	Eric Drummond	That looks real good.
01:12:36	Eric Drummond	Picking these locations, it's a huge task. I mean, I do so much research in the off season, so much reading. And Uummannaq is a place that has everything that I'm looking for, I've got several locations mapped out, and there's a settlement in Uummannaq, it could make it very easy for us if we find something significant to make money off of that.
01:12:38		GRAPHICS ON SCREEN: ERIC DRUMMOND GEOLOGIST
01:12:55	Eric Drummond	You guys can come right in here, there's a good landing right here.
01:12:58	Gator Schoose	Being split up from the rest of the team now is weird, but the three of us know that we gotta get the job done, so that's what we're gonna do.
01:13:01		GRAPHICS ON SCREEN: GATOR SCHOOSE EXCAVATION EXPERT
01:13:04	Eric Drummond	Guys? We're looking at a really nice section here; we've got rust-colored granite with quartz in it. Very mineralized.
01:13:12	Eric Drummond	Oh, this is great looking stuff. This rock has these quartz seams running through it.
01:13:17	Eric Drummond	Often times the gold will within quartz, so likely I'll be seeing gold in it once we process it.
01:13:23	Gator Schoose	You doing okay over there, Eric?
01:13:24	Eric Drummond	Yeah, I'm doing good, I'm almost done. How about you guys?
01:13:26	Gator Schoose	Yeah.
01:13:26	Americo Disantis III	Just about done.

01:13:28	Americo Disantis III	There's something going on in here, it looks like everything I've seen before that indicates gold. So, right now, I got a smile on my face.
01:13:30		GRAPHICS ON SCREEN: AMERICO DIS ANTIS III DRILLER
01:13:34	Eric Drummond	Alright. Let's get down off the mountain here.
01:13:36	Americo Disantis III	The three of us are like this well-oiled machined, we do not miss a beat, if it's there we'll find it, I have faith in the three of us.
01:13:45		GRAPHICS ON SCREEN: ILULISSAT
01:13:52	Josh Feldman	Here we go.
01:13:53	John Self	Alright.
01:13:53	Josh Feldman	Let's do it.
01:13:55	Narrator	100 miles south, Josh, Jesse and John board a boat to head to their second target as a team.
01:14:00	Josh Feldman	Should be about an hour and 40 minutes up to the target.
01:14:03	Narrator	But, rather than setting up a base camp, they plan to take boats to many different islands, with only half of the group's already limited funds. They'll only have a few chances to strike gold before they run out of money.
01:14:15	Josh Feldman	I've got a bunch of targets, we're gonna hit 'em, we're gonna hit 'em quick. I wanna prove to Eric that our method works.
01:14:16		GRAPHICS ON SCREEN: JOSH FELDMAN HARD ROCK MINER
01:14:22	Narrator	Their first prospect is a tiny unnamed island, just 40 miles north of Ilulissat.
01:14:28	Narrator	The Feldmans spotted the location nine days ago, on their trip to Eqi base camp.

01:14:33	Jesse Feldman	We're going to a target that Josh and I saw from a boat, this is our methodology, this is what we like to do; this is not staring at Eric and waiting for him to tell me what to do.
01:14:37		GRAPHICS ON SCREEN: JESSE FELDMAN HARD ROCK MINER
01:14:51	Narrator	As their boat captain continues navigating through the fjord leading to the island.
01:14:55	Jesse Feldman	Damn man, look at this.
01:14:57	John Self	Yeah, this isn't good. It gets thicker too up ahead; this ain't nothing.
01:15:02	Jesse Feldman	Yeah. Winter's coming.
01:15:04	Narrator	It quickly becomes clear that their hastily sketched gold prospecting plan has problems.
01:15:09	Josh Feldman	The ocean's just white.
01:15:11	Narrator	The Feldmans target is over three hours north of Ilulissat, and, as winter closes in, icebergs filling the water make travelling in the area slow going.
01:15:19	Narrator	Or completely impassible.
01:15:21	Jesse Feldman	I don't know if we're gonna make it.
01:15:24	Jesse Feldman	It's just ice, after ice, after ice.
01:15:26	Jesse Feldman	Our day might be completely done. Greenland is fighting us, everything is ten times harder; she's fighting back, she's telling us go home, she doesn't want us here anymore. We didn't see it coming but it's here, we gotta deal with it; it's a race against winter.
01:15:42	John Self	Well, this is Greenland throwing another <BLEEP> great hook our way.
01:15:45	Jesse Feldman	Yeah.
