

安全生产体系对施工现场管理的作用研究

摘 要

在平时的工程建设中，安全生产体系对施工现场管理的作用是不容小觑的，它小到关系到房屋建设的质量安全，大到入住者的安全问题。安全生产体系对施工现场管理中必须坚持安全第一,防患于未然。施工现场管理的安全体系作为我们党和国家的一项重要体系,同时作为社会主义企业管理中一项基本原则。

近年来，中国的安全工作面临着新的挑战 and 机遇。生产必须安全，安全是生产的保证，如何促进安全生产文化，提高企业安全管理水平。施工现场安全管理是其中之一，建立完善的安全生产系统工程不仅需要增加管理层的注意力，还需要对安全部门进行监督和检查，还要求每个施工人员都要提高安全和防火安全意识，做到了这些才能有效地控制施工现场的安全，才能使得工程顺利如期完成。

关键字：施工安全；生产；事故隐患

Abstract

In peacetime engineering construction, the role of safety production system in construction site management can not be underestimated, it is small to the quality and safety of housing construction, large to the safety of occupants. Safety production system must adhere to safety first in construction site management and prevent accidents before they occur. The safety system of construction site management is an important system of our party and country, and also a basic principle of socialist enterprise management. In recent years, China's security work has faced new challenges and opportunities. Production must be safe. Safety is the guarantee of production. How to promote safety production culture and improve safety management level of enterprises? Safety management of construction site is one of them. Establishing a perfect safety production system project not only needs to increase the attention of management, but also needs to supervise and inspect the safety department. It also requires every construction worker to improve safety and fire safety awareness. Only by doing this, can the safety of construction site be effectively controlled and the project can be completed smoothly and on schedule.

Key word: Construction safety; Production; Accidents
