Internet

made the first computer in the world. After that time, the computer developed rapidly day by day. It made a huge revolution in our daily life, and our human beings get lots of benefits from it.

Nowadays the computer running more faster than before, it can come out a huge scores in a moment, more quicker than a man. Because we made the computers and they think of things like us. Because of this, some people worried about that someday the computer be more clever than human that we couldn't control of them anymore.

But in my opinion, the most dangerous thing is not that the computer will begin to think like man, but man will begin to think like the computer. Nowadays, no matter at work or in our daily life, more and more people rely on computers.

Internet

Nowadays, using computer became more and more popular. With it, we can talk with people who is in the distance. We can know everything without going out. Besides, we can shop online, and so on.

However, though computer give us convenience, there is a danger. The real danger is not that the computer will begin to think like a man, but

that man will begin to think like the computer. Many younger and students who are lazy to work will search for the ~~in~~ Internet. Therefore, people will think less, and ~~doing~~ do a little. And ~~that~~ man will rely on computer for everything. Any more, The ~~development~~ of the motherland will ~~decrease~~ decrease.

As far as I'm concerned, computer is a <sup>good</sup> ~~good~~ tool if we use it ~~right~~ right. We shouldn't take the ~~question~~ answers that others' ~~thinking~~ thinking for granted. We should absorb other's good idea but not cheat it. We should have our own ~~ideas~~ ideas and make new function.

In a word, we shouldn't have the same thinking for from computer.

Self-image is your own mind's picture of yourself. This image includes the way you look, the way you act, the way you talk and the way you think. **Interestingly**, our self-images are often different from the images others hold about us. **Unfortunately**, most of these images are more negative than they should be.
