2020

China has become the first country to land a spacecraft on the far side of the moon. The unmanned Chang'e-4 probe (探测器) -- the name was inspired by an ancient Chinese moon goddess 61 (touch) down last week in the South Pole-Aitken basin. Landing on the moon's far side is 62 (extreme) challenging. Because the moon's body blocks direct radio communication with a probe, China first had to put a satellite in orbit above the moon in a spot 63 it could send signals to the spacecraft and to Earth. The far side of the moon is of particular 64 (interesting) to scientists because it has a lot of deep craters (环形山), more so 65 the familiar near side. Chinese researchers hope to use the instruments onboard Chang'e-4 66 (find) and study areas of the South Pole-Aitken basin. "This really excites scientists," Carle Pieters, a scientist at Brown University, says, "because it 67 (mean) we have the chance to obtain information about how the moon 68 (construct)." Data about the moon's composition, such as how 69 ice and other treasures it contains, could help China decide whether 70 (it) plans for a future lunar (月球的) base are practical. (2020全国 I)

China has become the first country to land a spacecraft on the far side of the moon. The unmanned Chang'e-4 probe (探测器) -- the name was inspired by an ancient Chinese moon goddess **61** (touch) down last week in the South Pole-Aitken basin. Landing on the moon's **62** (extreme) challenging. Because the moon's body blocks radio communication with a probe, China first had to put a satellite in orbit above the moon in a spot **63** it could send signals to the spacecraft and to the far side of the moon is of particular **64** (interesting) to scientists because it has **64** (more) craters (环形山), more so **65** the familiar near side. Chinese researchers **65** (want) to use the instruments onboard Chang'e-4 **66** (find) and study areas of the South Pole-Aitken basin. "This really excites scientists," Carle Pieters, a scientist at Brown University, says, "because it **67** (mean) we have the **67** (main) information about **68** (construct)." Data about **69** (much) ice and other treasures it contains **70** (it) help China decide whether **70** (it) plans for a future lunar (月球) base are practical. (2020全国1)
