Chapter 3: Contacting Dell.....	22

Introduction

Dell Hybrid Client (DHC) is a desktop solution that follows the Software-as-a-Service (SaaS) model of software delivery. It provides a hybrid operating environment that enables you to access virtual, cloud, or local applications and resources seamlessly. It encompasses the cloud and storage aggregation for maintaining security and simplicity.

Dell Hybrid Client 2403 can be deployed on three Ubuntu Dell-based operating systems, Ubuntu 20.04 LTS 64-bit, Ubuntu 22.04 LTS 64-bit, and Ubuntu 22.04 LTS 64-bit (FDE). It has a minimum memory (RAM) of 8 GB and disk storage of 64 GB or higher.

Version

Dell Hybrid Client version 2403.43

Wyse Management Suite Pro version 4.x

Wyse Management Suite Configuration UI package 1.10.282 and later versions

 **NOTE:** Use Wyse Management Suite to upgrade your Dell Hybrid Client firmware to the latest version. For detailed information, see *Dell Hybrid Client Administrator's Guide* at [Dell Support](#).

Ubuntu version

Ubuntu 20.04 LTS 64-bit

Ubuntu 22.04 LTS 64-bit

Ubuntu 22.04 LTS 64-bit (FDE)

Release date

April 2024

New and Enhanced Features of Dell Hybrid Client 2403

Configuring Terminal Name support in WMS

You can configure the Terminal Name from WMS. A new Terminal Name field is added to **Groups & Configs** in Wyse Management Suite. You can also change the device host name from Wyse Management Suite.

SCEP and 802-1x Enhancements

The following are the new options that are added in SCEP and 802-1x:

- **Sub Alt name** — This option specifies the client certificate's subject alternative name. It is either a DNS name or an IP address.
- **Enable Auto Renew** — This option helps to enable or disable the automatic certificate renewal process.
- **Select Auto Renew Time Frame** — This option specifies the certificate renew time frame (in percentage) between certificate valid start time and valid end time.
