Overview

About this Product specification

It describes the performance of the track motion in terms of:

- The structure and dimensional prints
- The fulfilment of standards, safety and operating requirements
- The load diagrams, mounting of extra equipment, the motion and reach
- The integrated auxiliary equipments as i.e: Customer Connections, Servo Gun
- The specification of variants and options available

Users

It is intended for:

- Product managers and Product personnel
- Sales and Marketing personnel
- Order and Customer Service personnel

Contents

1 Description

1.1 Structure

1.1.1 Introduction

General

RTT 1600/2400 is a single axis robot carrier intended for an IRB 1600/2400 with or without a Marathon Pac with electrode. Holders for the cooling unit and splatter cleaning equipment are not included.

The movement on the track motion is programmed using the robot FlexPendant in the same way as the robot's other axes.

Operating system

The RTT is equipped with the IRC5 controller and robot control software, RobotWare. RobotWare supports every aspect of the robot system, such as motion control, development and execution of application programs, communication etc. See *Product specification - Controller IRC5 with FlexPendant*.

Safety

Safety standards valid for complete robot, manipulator and controller.

Additional functionality

For additional functionality, the robot can be equipped with optional software for application support - for example gluing and welding, communication features - network communication - and advanced functions such as multitasking, sensor control etc. For a complete description on optional software, see the *Product specification - Controller software IRC5*.
