## **Brief Analysis of the Application of Juxtaposition in Photography**

**Abstract:** Juxtaposition, one of the common forms of expression in photography, is to form a new picture by putting two or more pictures having logical connections together. Juxtaposition can be taken as one type of jigsaw but is not equivalent to it. In the present paper, we studied many photographic works to explore the specific types and the functional construction of juxtaposition.

**Key words:** juxtaposition, comparison, photographic language
