2013 年全国硕士研究生入学考试英语一真题及答案 Section I Use of English

Directions:

Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on ANSWER SHEET 1. (10 points)

People are, on the whole, poor at considering background information when making individual decisions. At first glance this might seem like a strength that 1 ______the ability to make judgments which are unbiased by ______2_factors. But Dr. Uri Simonsohn speculated that an inability to consider the big _____3_ was leading decision-makers to be biased by the daily samles of information they were working with. ______4_, he theorised that a judge _____5_ of apperaring too soft _____6_ crime might be more likely to send someone to prison _____7_ he had already sentenced five or six other defendants only to forced community service on that day

To <u>8</u> this idea, he turned to the university-admissions	process. In theory, the	9	of an
applicant should not depend on the few others	<u>10</u> randomly for interview during the same		
day, but Dr. Simonsoho suspected the truth was	<u> 11 </u> 。		

He studied the results of 9,323 MBA interviews

12 by 31 admissions officers. The

[D] unless

	·		•		
interviewers had 13	_applicants on a scale of o	one to five. This scale	<u>14</u> numerous factors		
into consideration. The scores were 15 used in conjunction with an applicant 's score on the					
Granduate Managent Adimssi	on Test, or GMAT, a stan	dardized exam which is	<u>16</u> out of 800		
points, to make a decision on v	whether to accept him or h	ner	0		
Dr. Simonsoho found if	the score of the previous c	candidate in a daily serie	s of		
interviewees was 0.75 points of	or more higher than that of	f the one	17 that, then the score for		
the next applicant would	<u>18</u> by an average	e of 0.075 points. This m	night sound small, but		
to <u>19</u> the effects of such a	a decrease a candidate cou	ald need 30 more GMAT	points than		
would otherwise have been	<u> 20 </u> 。				
1. [A] grants	[B]submits	[C]transmits	[D]delivers		
2. [A] minor	[B]objective	[C]crucial	[D] external		
3. [A] issue	[B]vision	[C]picture	[D]external		
4. [A] For example	[B] On average	[C]In princip	le [D]Above all		
5. [A] fond	[B] fearful	[C]capable	[D] thoughtless		
		[~]•abaore

Read the foll	owing four texts. Answer the questi	ons below each text by choos	ing A, B, C		
or D. Mark your answers on ANSWER SHEET 1. (40 points)					
Text 1					
In the 2006 film version of The Devil Wears Prada ,Miranda Priestly, played by Meryl					
Streep, scolds her unattractive assistant for imagining that high fashion doesn 't affect her,					
Priestly explains how the deep blue color of the assistant 's sweater descended over the years					
from fashion shows to departments stores and to the bargain bin in which the poor girl doubtless found her garment					
This top- c	lown conception of the fashion busi	ness couldn 't	be more out of date or at odds		
	vould described in Overdressed,	Eliazabeth Cli	J		
" fast fashion	. In the last decade or so ,ad H&M and Uniclo to react to trend	vances in technology have all		-market	

labels such as Zara ,H&M, and Uniqlo to react to trends more quickly and anticipate demand

more precisely. Quicker turnarounds mean less wasted inventory, more frequent release,

t advertise that to

and more profit. These labels encourage style-conscious consumers to see clothes as meant to last only a wash or two, although they don disposablerenew their wardrobe every few weeks. By offering on-trend items at dirt-cheap prices, Cline argues, these brands have hijacked fashion cycles, shaking an industry long accustomed to a seasonal pace о

The victims of this revolution, of course ,are not limited to designers. For H&M to offer a \$5.95 knit miniskirt in all its 2,300-pius stores around the world, it must rely on low-wage overseas labor, order in volumes that strain natural resources, and use massive amounts of harmful chemicals ο

Overdressed is the fashion world 's answer to consumer -activist bestsellers like Michael 's Dilemma. Pol lan 's The Omnivore -proMased clothing ,like fast food, fills a hunger and Cline argues. Americans, she finds, buy roughly 20 durable and wasteful, need, yet is non-" billion garments a year - about 64 items per person - and no matter how much they give away, this excess leads to waste о

Towards the end of Overdressed, Cline introduced her ideal, a Brooklyn woman named Sarah Kate Beaumont, who since 2008 has made all of her own clothes - and beautifully. But as Cline is the first to note, it took Beaumont decades to perfect her craft; her example can be knocked off о

Though several fast-fashion companies have made efforts to curb their impact on labor and the environment - including H&M, with its green Conscious Collection line -Cline believes lasting change can only be effected by the customer. She exhibits the idealism common to many advocates of sustainability, be it in food or in energy. Vanity is a constant; people will ' t afford not to only start shopping more sustainably when they can

21. Priestly criticizes her assistant for her

[A] poor bargaining skill

[B] insensitivity to fashion о

[C] obsession with high fashion

[D] lack of imagination

22. According to Cline, mass-maket labels urge consumers to

о

0

о

о

[A] combat unnecessary waste

•

[B] shut out the feverish fashion world

[C] resist the influence of advertisements

0

[D] shop for their garments more frequently

о

23. The word "indictment" (Line 3, Para.2) is closest in meaning to

0

о

о

о

0

[A] accusation 。

[B] enthusiasm 。

[C] indifference

[D] tolerance 。

24. Which of the following can be inferred from the lase paragraph?

[A] Vanity has more often been found in idealists

[B] The fast-fashion industry ignores sustainability

[C] People are more interested in unaffordable garments

[D] Pricing is vital to environment-friendly purchasing

25. What is the subject of the text?

[A] Satire on an extravagant lifestyle

[B] Challenge to a high-fashion myth 。

[C] Criticism of the fast-fashion industry

[D] Exposure of a mass-market secret

Text 2

An old saying has it that half of all advertising budgets are wasted-the trouble is, no one knows which half . In the internet age, at least in theory ,this fraction can be much reduced . By watching what people search for, click on and say online, companies can aim " behavioural " ads at those most likely to buy _o

о

о

о

In the past couple of weeks a quarrel has illustrated the value to advertisers of such fine-grained information: Should advertisers assume that people are happy to be tracked and sent behavioural ads? Or should they have explicit permission?

want to be followed .Microsoft's Internet Explorer and Apple's Safari both offer DNT ;Google's

Chrome is due to do so this year. In February the FTC and Digltal Adwertising Alliance (DAA) agreed that the industry would get cracking on responging to DNT requests

On May 31st Microsoft Set off the row: It said that Internet Explorer 10,the version due to appear windows 8, would have DNT as a default

It is not yet clear how advertisers will respond. Geting a DNT signal does not oblige anyone to stop tracking, although some companies have promised to do so. Unable to tell whether someone really objects to behavioural ads or whether they are sticking with Microsoft 's default, some may ignore a DNT signal and press on anyway

Also unclear is why Microsoft has gone it alone. Atter all, it has an ad business too, which it says will comply with DNT requests, though it is still working out how. If it is trying to upset Google, which relies almost wholly on default will become the norm. DNT does not seem an obviously huge selling point for windows 8-though the firm has compared some of its other products favourably with Google's on that count before. Brendon Lynch, Microsoft's chief

that simple?

26. It is suggested in paragraph 1 that

"behavioural" ads help advertisers to:

о

о

[A] ease competition among themselves

[B] lower their operational costs

[C] avoid complaints from consumers

[D] provide better online services

27. "The industry " (Line 6, Para.3) refers to:

[A] online advertisers

[B] e-commerce conductors

[C] digital information analysis

[D] internet browser developers

28. Bob Liodice holds that setting DNT as a default

[A] many cut the number of junk ads

[B] fails to affect the ad industry

[D] goes against human nature

29. which of the following is ture according to Paragraph.6?

[A] DNT may not serve its intended purpose

[B] Advertisers are willing to implement DNT

[C] DNT is losing its popularity among consumers

[D] Advertisers are obliged to offer behavioural ads

30. The author's attitude towards what Brendon Lynch said in his blog is one of:

[A] indulgence

[B] understanding

[C] appreciaction

[D] skepticism

Text 3

•

Now utopia has grown unfashionable, as we have gained a deeper appreciation of the range of threats facing us, from asteroid strike to pandemic flu to climate change. You might even be tempted to assume that humanity has little future to look forward to

But such gloominess is misplaced. The fossil record shows that many species have endured for millions of years - so why shouldn't we? Take a broader look at our species' place in the universe, and it becomes clear that we have an excellent chance of surviving for tens,

Least Concern as the species is very widely distributed, adaptable, currently increasing, and

So what does our deep future hold? A growing number of researchers and organisations are now thinking seriously about that question. For example, the Long Now Foundation, based in San Francisco, has created a forum where thinkers and scientists are invited to project the implications of their ideas over very long timescales. Its flagship project is a mechanical clock, buried deep inside a mountain in Texas, that is designed to still be marking time thousands of years hence

Then there are scientists who are giving serious consideration to the idea that we should recognise a new geological era: the Anthropocene. They, too, are pulling the camera right

"). Look up

о

back and asking what humanity's impact will be on the planet - in the context of stratigraphic time 。

Perhaps perversely, it may be easier to think about such lengthy timescales than about the more immediate future. The potential evolution of today's technology, and its social consequences, is dazzlingly complicated, and it's perhaps best left to science-fiction writers and futurologists to explore the many possibilities we can envisage. That's one reason why we have launched Arc, a new publication dedicated to the near future

But take a longer view and there is a surprising amount that we can say with considerable assurance. As so often, the past holds the key to the future: we have now identified enough of the long-term patterns shaping the history of the planet, and our species, to make evidence-based forecasts about the situations in which our descendants will find themselves

This long perspective makes the pessimistic view of our prospects seem more likely to be a passing fad. To be sure, the future is not all rosy: while our species may flourish, a great many individuals may not. But we are now knowledgeable enough to mitigate many of the risks that threatened the existence of earlier humans, and to improve the lot of those to come. Thinking about our place in deep time is a good way to focus on the challenges that confront us today, and to make a future worth living in

о

о

- 31. Our vision of the future used to be inspired by
- [A] our desire for ares of fulfillment
- [B] our faith in science and teched
- [C] our awareness of potential risks
- [D] our bdief in equal opportunity
- 32. The IUCN "Rod List" suggest that human beings on
- [A] a sustained species
- 's deminant power [B] the word
- [C] a threat to the environment
- [D] a misplaced race
- 33. Which of the following is true according to Paragraph 5?

о

о

[A] Arc helps limit the scope of futurological studies

[B] Technology offers solutions to social problem

[C] The interest in science fiction is on the rise	
[D] Our Immediate future is hard to conceive	
34. To ensure the future of mankind, it is crucial to	
[A] explore our planet 's abundant resources	o
[B] adopt an optimistic view of the world	o
[C] draw on our experience from the past	O
[D] curb our ambition to reshape history	0
35. Which of the following would be the best title for th	e text?

[A] Uncertainty about Our Future

[B] Evolution of the Human Species

[C] The Ever-bright Prospects of Mankind

[D] Science, Technology and Humanity

Text 4

Text 4

's immigration On a five to three vote, the Supreme Court knocked out much of Arizona law Monday-a modest policy victory for the Obama Administration. But on the more important matter of the Constitution, the decision was an 8-0 defeat for the Administration , S effort to upset the balance of power between the federal government and the states о In Arizona v. United States, the majority overturned three of the four contested s controversial plan to have state and loc provisions of Arizona al police enforce federal , immigration law. The Constitutional principles that Washington alone has the power to " establish a uniform Rule of Naturalization " and that federal laws precede state laws are noncontroversial. Arizona had attempted to fashion state policies that ran parallel to the existing federal ones 0 Justice Anthony Kennedy, joined by Chief Justice John Roberts and the Court 's liberals, ruled that the state flew too close to the federal sun. On the overturned provisions the " occupied the field and Arizona had thus majority held th e congress had deliberately " 's privileged powers. intruded on the federal

о

о

о

0

However, the Justices said that Arizona police would be allowed to verify the legal status of people who come in contact with law enforcement the true of true of the true of true

Two of the three objecting Justice-Samuel Alito and Clarence Thomas-agreed with this Constitutional logic but disagreed about which Arizona rules conflicted with the federal statute. The only major objection came from Justice Antonin Scalia, who offered an even more robust defense of state privileges going back to the alien and Sedition Acts

The 8-0 objection to President Obama turns on what Justice Samuel Alito describes in his objection as "a shocking assertion assertion of federal executive power ". The White House argued that Arizona 's laws conflicted with its enf orcement priorities, even if state laws complied with federal statutes to the letter. In effect, the White House claimed that it could invalidate any otherwise legitimate state law that it disagrees with _°

Some powers do belong exclusively to the federal government, and control of citizenship and the borders is among them. But if Congress wanted to prevent states from using their own resources to check immigration status, it could. It never did so. The administration was in essence asserting that because it didn ' t want to carry out Congress ' s immigration wishes, no state should be allowed to do so either. Every Justice rightly rejected this remarkable claim .

36.	Three provisions of Arizona 's plan were overturned becau	ise they
[A]	deprived the federal police of Constitutional powers	O
[B]	disturbed the power balance between different states	o
[C]	overstepped the authority of federal immigration law	0
[D]	contradicted both the federal and state policies 。	

37. On which of the following did the Justices agree, according to Paragraph4?

[A]	Federal officers ' duty to withhold immigrants	' information 。
[B]	States ' independence from federal immigration law	ο
[C]	States ' legitimate role in immigration enforcement	o
[D]	Congress 's intervention in immi gration enforcer	nent 。

38. It can be inferred from Paragraph 5 that the Alien and Sedition Acts

о

[A] violated the Constitution

- undermined the states [B] ' interests о
- supported the federal statute [C]
- stood in favor of the states [D]
- The White House claims that its power of enforcement 39.

In the following article, some sentences have been removed. For Questions 41-45, choose the most suitable one from the list A-G to fit into each of the numbered blank. There are two extra choices, which do not fit in any of the gaps. Mark your answers on ANSWER SHEET 1. (10 points)

The social sciences are flourishing. As of 2005, there were almost half a million professional social scientists from all fields in the world, working both inside and outside academia. According to the World Social Science Report 2010, the number of social-science students worldwide has swollen by about 11% every year since 2000.

's global challenges Yet this enormous resource in not contributing enough to today including climate change, security, sustainable development and health о Humanity has the necessary agro-technological tools to eradicate hunger, from (41)____ genetically engineered crops to arificial fertilizers . Here , too, the problems are social: the organization and distribution of food, wealth and prosperity о

Today ,the social sciences are largely focused on disciplinary problems and internal scholarly debates,rather than on topics with external impact .

Analyses reveal that the number of papers including the keywords "environmental changed" or "climate change" have increased rapidly since 2004,(43)_____

When social scientists do tackle practical issues ,their scope is often local:Belgium is interested mainly in the effects of poverty on Belgium for example .And whether the community ' swork contributes much to an overall accumulation of knowledge is doubtful

The problem is not necessarily the amount of available funding (44)_____this is an adequate amount so long as it is aimed in the right direction. Social scientists who complain ab out a lack of funding should not expect more in today 's economic climate

The trick is to direct these funds better. The European Union Framework funding programs have long had a category specifically targeted at social scientists. This year, it was

о

[A] It could be that we are evolving two communities of social

scientists:one that is discipline-oriented and publishing in highly

specialized journals, and one that is problem-oriented and publishing

elsewhere, such as policy briefs

[B] However, the numbers are still small:in 2010, about 1,600 of the

100,000 social-sciences papers published globally included one of these

о

Keywords 。

[C] the idea is to force social to integrate their work with other categories, including health and demographic change food security, marine research and the bio-economy, clear, efficient energy; and inclusive, innovative and secure societies

[D] the solution is to change the mindset of the academic community, and what it considers to be its main goal. Global challenges and social innovation ought to receive much more attention from scientists, especially the young ones

[E] These issues all have root causes in human behavior . all require behavioral change and social innovations , as well as technological development . Stemming climate change , for example , is as much about changing consumption patterns and promoting tax acceptance as it is about developing clean energy

[F] Despite these factors , many social scientists seem reluctant to tackle such problems .
 And in Europe , some are up in arms over a proposal to drop a specific funding category for social-science research and to integrate it within cross-cutting topics of sustainable development .

[G] During the late 1990s, national spending on social sciences and the humanities as
 a percentage of all research and development funds-including government, higher education,
 non-profit and corporate -varied from around 4% to 25%; in most European nations, it is
 about 15% .

It is speculated that gardens arise from a basic need in the individuals who made them: the need for creative expression. There is no doubt that gardens evidence an impossible urge to create, express, fashion, and beautify and that self-expression is a basic human urge; (46) Yet when one looks at the photographs of the garden created by the homeless, it strikes one that , for all their diversity of styles, these gardens speak os various other fundamental urges, beyond that of decoration and creative expression

One of these urges had to do with creating a state of peace in the midst of turbulence, a

still point of the turning world,
to borrow a phrase from T. S. Eliot. (47) <u>A sacred place of peace, however crude it may be, is a distinctly human need, as opposed to shelter, which is
<u>a distinctly animal need.</u> This distinction is so much so that where the latter is lacking, as it is for these unlikely gardens, the foemer becomes all the more urgent. Composure is a state
of mind made possible by the structuring of one
s relation to one
