Information in SAPNet, link Data-Archiving

Hints on Preparing This Course

See "Courses Recommended as Preparation"
See "Online Help Recommended as Preparation"
See information on training system (next page).

Training System

Data Required

1. Exercise "Write and Delete Programs"

There must be entries in STICKET and SBOOK.
Programs to generate entries:
SBOOK: SAPBC_DATA_GENERATOR
STICKET: SFLIGHT_DATA_GEN
For the exercise the trainer has to archive ZBCSTICKET.

2. Exercise "Sequential Reporting"
For the exercise the trainer has to archive SD_VBKA.
For the exercise 'archiving classes' SD_VBKA with archiving class text has to be archived.
Please use the SAP AS to check whether the archived data contains the archiving class TEXT before you delete the data from the database.

User ID and Passwords for Course Participants
User: BIT670-## (## = the number on the monitor in the training room)
Password: init

Must first be created in transaction *ZSUR*

Copy User TRAINING.

Preparation in the System

0) The setting enqueue must be turned off in the training system.
At present, the instructor can do this in 4.6 systems by using the report ZSENQOFF.
This may change and it may be defined as in 4.0 training systems with off and on.
The course has the course restriction enqueue off.

1) Create users (see above)

**2) Access to an archived document (via SAP ArchiveLink); you should work with the archive
  system 00 in Walldorf.**

  Check whether the archive 00 exists in transaction *OAC0*.

4) Carry out the exercises before the course starts.
  If there are any problems, contact Monika Schleicher

5) Archivable entries in ZBCSTICKET and SD_VBKA:
  these are listed in the instructor guide.
