A city without cars would be very strange, right? But Venice is such a city.

Venice is in the northeast of Italy. It wasn't built on land like most cities, but on more than 110 islands. Sea water is everywhere around the city.

Even so, travel isn't difficult. The waterways are always the best way to get around. There are 117 waterways and more than 400 bridges. They can guide you where to go. People in Venice often move from place to place by boat.

Water makes the city special, but it is also a big problem. Sometimes tourists will have such different experiences. They may walk across the Rialto Bridge, and there's nothing special. But when they come back to the bridge an hour later, it's under water and everyone needs to wear rain shoes.
