

基于 Java 的网上培训报名系统的设计与实现

摘要

培训作为一种专业化程度较高的教育模式，深受众多学生和职员喜爱。随着培训规模的扩大，对招生管理工作有了更高的要求，传统的招生模式存在诸多缺陷，已不能满足当前所需。因此，结合培训机构的实际所需，开发出一套有利于招生报考管理的系统势在必行。基于此，本文研究并开发了一套基于 Java Web 的网上培训报名系统。

本文论述了网上报名系统的研究背景、研究意义、国内外现状对比及其可能的发展趋势，对系统开发的相关技术进行了介绍，并详细分析了系统的需求，设计了系统的结构，实现了系统的功能，测试了系统的效果。

关键词：报名系统；软件开发；信息化；Java Web

ABSTRACT

As a highly specialized educational model, training is deeply loved by many students and employees. With the expansion of training scale, higher requirements are put forward for enrollment management. The traditional enrollment model has many defects and can no longer meet the current needs. Therefore, combined with the actual needs of training institutions, it is imperative to develop a system conducive to enrollment management. Based on this, this paper studies and develops an online training registration system based on Java Web.

This paper discusses the research background, research significance, comparison of current situation at home and abroad and its possible development trend, introduces the related technologies of system development, analyzes the system requirements in detail, designs the system structure, realizes the system functions, and tests the system effects.

Keywords:Registration system; Software development; Informatization; Java Web
