

流动颜色

本课内容介绍

教材简析：

红、黄、蓝三原色在幼稚园时学生就已接触过。原色互混产生间色、复色，在以前教材中都是以调色、色谱等形式向学生介绍。而本课教材引导学生让这三种颜色相互流动，观察色彩改变。

流动颜色小故事

有一天，一个叫欢欢的小朋友在家画画

突然，

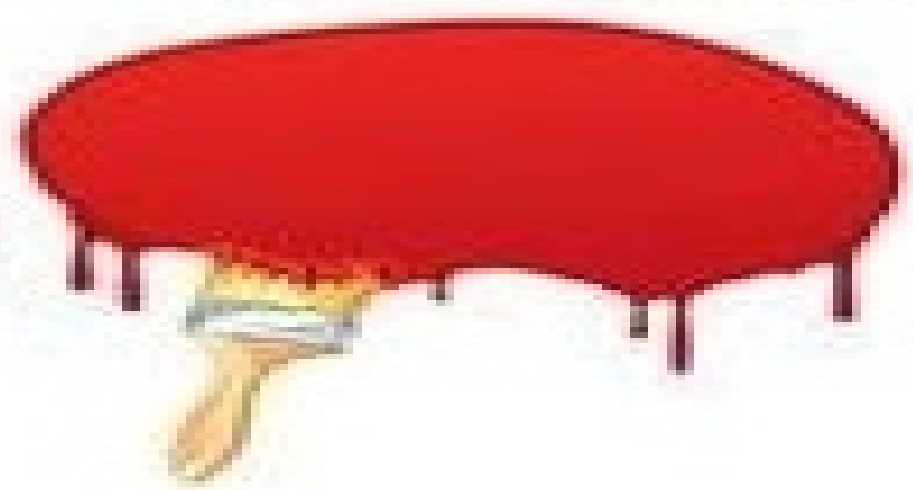

颜料被
打翻了

NO:2011112151089393

所有的颜色都跳了起来，
变成了水滴娃娃。...

A high-speed photograph capturing a dynamic splash of liquid. The splash is composed of several distinct colors: a large yellow-green section on the left, a blue section at the top center, and a red section on the right. The liquid is captured in mid-air, creating a sense of motion and energy. The background is a solid black, which makes the vibrant colors of the splash stand out. The text "混合在了一起。" is overlaid on the lower left portion of the splash.

混合在了一起。

变成了五颜六色

作品观赏
