The Mayan ()Indians lived in Mexico for thousands of years before the Spanish arrived in the 1500s. The Mayan achievements were many. They had farms, beautiful palaces, and cities with many buildings. The Mayan people knew a lot about nature and the world around them. This knowledge helped them to live a better life than most people of that time, because they could use it to make their lives more comfortable and rewarding. Knowledge about tools and farming, for example, made their work easier and more productive.

The Maya believed in many gods, including rain gods, sun gods, and corn gods. The people built large temples to honor the Mayan gods. Skillful workers built cities around these temples. It was difficult for them to build these cities, because they had no horses to carry the heavy stone they used to build with. Workers had to carry all of the building materials themselves. Today, many of these ancient Mayan cities and temples are still standing.

Although the cities that the Maya built were beautiful, and the people worked hard to build them, very few of the people lived in them. Usually, only the priests lived in the cities.

The other people lived in small villages in the forests. Their houses were much simpler than the elaborate buildings in the cities. They lived in small huts with no windows. The walls were made of poles covered with dried mud, and the roof was made of grass or leaves. Most Maya lived a simple life close to nature.

calendar from what they learned. The year was divided into 18 months of 20 days each with five days left over . The Mayan calendar was far more exact than the European calendars of the time.

Around the year 800, the Maya left their villages and beautiful cities, never to return. No one knows why this happened. They may have died from some disease. They may have left because the soil could no longer grow crops.

Archaeologists are still trying to find the lost secrets of the Maya.

- A. easily built
- B. carefully made
- C. slowly fixed
- D. quickly designed

54. From the passage we can infer that _____.

- A. most Maya lived in beautiful cities
- B. many Mayan cities and temples are still standing
- C. the Maya were intelligent and culturally rich people
- D. the Mayan calendar was the same as European calendars

55. What can be the best title for this article?

- A. Mayan Gods
- B. Mayan Buildings
- C. Productive Maya
- D. Mysterious Maya

D

Fighting fires has always been a dangerous job. The job has grown even more risky in recent years. That's because changes in building over the last 30 years have resulted in hotter fires that are more unpredictable. Today's buildings use many more synthetic materials than those built 30 years ago did. As a result, when they catch fire, they burn at a much higher temperature and give off much
